Integrated Report Designer

Eclipse™ 700 Integrated Security Suite

For a host of customer applications, from basic access control to Enterprise-Class total security requirements
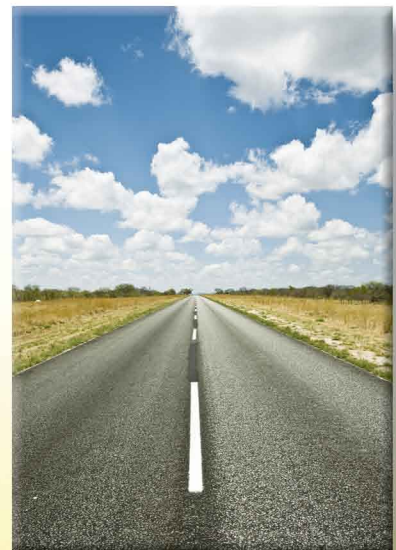

Who Says You Can't Have It All?

Eclipse™ 700 is compatible with all of the acclaimed open standard Mercury Security access control panels. The system is built on the powerful Windows .NET platform with a full suite of integrated security features including: Access Control, Intrusion Detection, Photo ID, Alarm Management, Biometric Support, FIPS Encryption, SQL Data Management, Report Designer, Graphics Mapping, Video Analytics, DVR support and Network Video Integration.

Eclipse 700 was born in .NET, it was not migrated from a previous operating environment. Because of this fact, the system is fast, secure, IT-friendly, and truly Windows Vista compatible. With *Eclipse*, you get all the power of .NET and Vista with the confidence that there are no underlying issues that came from a previous generation.

In addition to the security, speed and power of the new Microsoft platforms, you can also enjoy connectivity with other data management systems such as HR, Time & Attendance or Visitor Management through LDAP which is the IT industry preferred method of data connectivity.

Simple Sophistication

Sometimes, getting all the integrated features you need means that you end up with a user interface designed by rocket scientists for use by rocket scientists. *Eclipse 700* breaks the mold. The user interface can be configured differently for every operator of the system. While some may prefer to see a very detailed view, others may wish to have a simplified view, or work only with the graphics maps. With *Eclipse*, you see what you want to see, what you are allowed to see, and in the layout format you choose. All configuration windows can be "docked" or floated to different locations. The possibilities are endless.

Eclipse™ 700 Full Featured and Cost Effective

**Integrated Security Management**

IT Friendly

Cost Effective

Flexible and Scaleable System Architecture

Eclipse™ 700 is scaleable from a single user, single reader system to a wide area enterprise system, that can support the most stringent requirements. All *Eclipse* systems can be tailored to meet your specific requirements. Whether you are installing a system in a new facility or retro-fitting an existing site, *Eclipse* is flexible, scaleable and economical. If your facility has high security requirements but very few doors, don't worry, you can get all of the integrated functions of *Eclipse 700* even if you only have a single reader. The Mercury Security access control panels are the most respected panels in the industry. If you already have these panels installed, *Eclipse* can work with your existing hardware and allow you to expand economically.

Custom Applications Without Custom Software

The *Eclipse 700* system provides you the unique set of tools you need to improve life safety and security for your facility. Included with the system is a powerful macro editing and input/output linking tool that allows you to define custom applications without the need to purchase custom developed software. *Eclipse* can be set up to automatically respond to emergency situations that you custom define. Your facilities can be locked down in an instant and people can be quickly accounted-for in an emergency situation.

Integrated Credentialing System

Eclipse ID™ is a fully integrated photo identification credentialing system available with the *Eclipse 700* systems. This "badging" system includes a template designer, photo capture tool, signature capture and provides support for biometrics, bar coding, watermarks, custom logos, backgrounds and fonts. Formats can be automatically assigned to card holders based on user specified criteria. Employees, contractors, visitors, VIPs and other credentials can be issued and tracked with the system.

Digital Horizon Solutions

Eclipse™ 700 Tailored for Your Specific Requirements

Casino Gaming

At Digital Horizon Solutions, we have industry experience, knowledge and expertise in a wide variety of security applications. We understand the vast differences across the market segments we serve and know that every facility is unique.

The *Eclipse™ 700* system was designed to provide our customers with a flexible solution that allows them to tailor the application to meet the diverse set of requirements they face. With *Eclipse*, you adapt the system to your requirements rather than changing your procedures to fit the system.

Configuring the *Eclipse 700* system is a breeze. The intuitive user interface makes it easy for you to establish the rules and automated responses that meet your facility requirements.

Eclipse 700 encompasses many powerful features and design characteristics that makes it "The Choice" for security professionals and IT Managers. *Eclipse* system installations include: casino-gaming, military, government, university, institutional, hospital, educational, commercial, office, campus and industrial complexes.

Education

Government

At Digital Horizon Solutions, we are always sensitive to the ever growing needs of our customers. We are constantly evaluating our systems, new technologies and open standards to make sure we are providing you with the solution-set you need to maintain a safe and secure environment.

Digital Horizon Solutions has partnered with the premier integration companies in the industry so that you can choose the *Eclipse 700* solution with the confidence and peace of mind that it will be professionally installed and supported.

Eclipse™ 700 — The New Standard for Access Control

Connectivity, Security and Reliability... Why Compromise?

Eclipse™ 700 supports a wide range of industry standard communications options including TCP/IP, RS-232, RS-485 and modem allow you to configure your system to suit your needs. Redundant communications options are available.
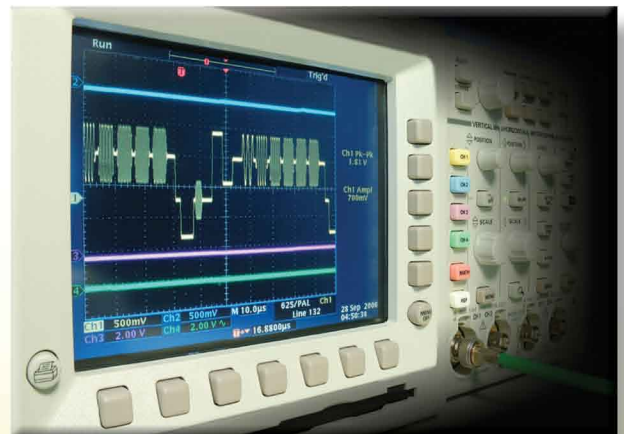

Data security is available in *Eclipse 700* by the full imlementation of the Federal Information Processing Standard (FIPS 197), utilizing the Advanced Encryption (AES), with 128 bit keys. *Eclipse* is designed to conform with the highest government security standards such as HSPD-12 and FIPS 201. In addition to a network of certified integration partners, all DHS products are available through **GSA Contract: GS-07F-0035T**

Life safety, employee accountability, and asset protection systems, along with system reliability are mission critical to your organization. *Eclipse* can run on a single server or multiple server configurations with options for redundant servers, and *Eclipse* supports Microsoft SQL Clustered Servers. *Eclipse* systems are designed to be reliable and secure even across an Internet connection if desired.

Other systems that rely on internet browsers are limited and do not provide adequate security. When you connect via the Internet with *Eclipse 700*, you can make your connection with our secure *Eclipse Clients* and enjoy the full functionality and security of the system.

Certifications – UL and CE

The Mercury Security panels are manufactured to the highest standards. There is no substitute for quality in a security application. The hardware is UL294 recognized and CE marked.

Digital Horizon Solutions

Digital Horizon Solutions   Corporate Profile

Who We Are

Based in Dallas Texas, Digital Horizon Solutions is a Keri Systems company.

Since 1990, Keri Systems has been an acknowledged industry leader in the design of PC-based access control systems. From the beginning, the Keri name has been synonymous with quality, integrity and a customer-oriented approach.

This commitment to excellence, along with a steadfast dedication to our resellers and end-user customers, has earned the company top honors among those who install and use our access control products and integrated security management systems.

Why Digital Horizon Solutions

At Digital Horizons Solutions, we are committed to providing our customers with excellent service, superior technology and exceptional quality at a competitive price.

Our systems are built on the latest open standard platforms and are based on industry standard non-proprietary hardware.

Engineering firms, IT professionals, integration partners and end-user customers agree that the *Eclipse*^{tm} *700* system from Digital Horizon Solutions provides you with a feature rich and affordable platform you can build on with confidence.

Please contact us at 888-592-1670
or 469-916-1670 to discuss how we can best help you!

# Integration Partners   Installation, Service and Training

Digital Horizon Solutions has a global network of trained and certified professional installation and support partners.

We can provide you with technical support around the globe and around the clock.

GSA *Advantage!*®
www.gsaadvantage.gov

Digital Horizon Solutions provides complete and comprehensive certification training to our integration partners and customers, at the professional learning center in Dallas, TX.

Whatever your needs may be, our select team of premiere partners can provide you with a total solutions package for integrated security management, including: threat assessment, risk analysis, site surveys, as well as complete system installation and training.

Digital Horizon Solutions would love to have an opportunity to talk to you about your needs and provide you with a presentation of our capabilities.

We can connect you with one of our professional partners in your area to help you design a solution that meets your facility requirements.
